ABOUT

CASIVA are stylish and durable phone cases designed to provide both protection and aesthetic appeal for your smartphone. Built with high-quality materials, CASIVA offers various models such as the Clear Magnetic MagSafe Case—perfect for iPhone users who want seamless MagSafe compatibility with a sleek transparent look. Each case is crafted to safeguard your phone from scratches, drops, and everyday wear while maintaining a modern, attractive appearance. With affordable prices and premium design, CASIVA are an ideal choice for those who value both functionality and style in their mobile accessories. CASIVA products are exclusively sold online, ensuring fast and safe delivery right to your door.

ADVANTAGES

CASIVA Cases stand out from other phone cases because:

- made from premium-quality materials that are resistant to yellowing keeping your phone looking clear and elegant even after long-term use

ADVANTAGES

- The case is strong and highly durable, offering excellent protection against drops and everyday impacts.

ADVANTAGES

- Designed with raised edges around the screen and camera, providing extra protection to prevent scratches when placed on flat surfaces.

With its combination of strength, long-lasting clarity, and thoughtful protective design, CASIVA Cases are the perfect choice for users who value maximum protection without sacrificing a premium look.

MARKETING

Casiva iPhone cases are marketed through a combination of digital marketing and retail distribution strategies.

Market Research: The Casiva team conducts online surveys and trend analysis to identify the most popular iPhone models and case styles such as transparent, marble pattern, or shockproof.

MARKETING

Digital Promotion:

- Casiva uses social media like TikTok to showcase product advantages such as impact resistance and premium design.
- Casiva uses advertisements on e-commerce platforms such as Tokopedia and Shopee.

MARKETING

Online Sales:

- Products are sold through e-commerce platforms such as Tokopedia, Shopee.
- To attract customers, Casiva also implements a discount strategy as part of its efforts to increase market appeal. This program includes price reductions during certain periods.

PRODUCTION & DISTRIBUTION

The manufacturing process for Casiva iPhone cases is carried out efficiently with a structured workflow from the design stage to the final product ready for sale in online stores.

- **Designing:** Casiva design team conducts trend research and design development for 2 days to ensure that the appearance of the case is in line with current market styles and needs.

PRODUCTION & DISTRIBUTION

- **Production:** The production and printing process takes about 3 days. In this phase, the materials are processed using modern printing technology to produce strong, precise, and elegant cases.

PRODUCTION & DISTRIBUTION

- **Packaging:** After the production process is complete, the products are packaged for 1 day, with attention to aesthetics and safety so that the products remain protected until they reach the buyer.
- **Distribution:** The final stage is distribution, which takes 1 day, where the products are sent to the warehouse and uploaded to the Tokopedia and Shopee online store platforms, where Casiva primarily markets its products to consumers.

CHALLENGES

CASIVA Cases are made from high-grade polycarbonate and resin materials, which are known for their strength and durability — but also for being challenging to process and shape. Unlike cheaper plastic cases, polycarbonate and resin require precise molding techniques and higher production standards to achieve their smooth finish and perfect fit. This makes CASIVA Cases more difficult and costly to produce, but the result is a stronger, more premium case that offers excellent impact resistance, long-lasting clarity, and a luxurious feel. The use of these materials reflects CASIVA's commitment to quality craftsmanship and superior protection for your device.

THANK YOU
